

PULVERIT®

VERNICI E RIVESTIMENTI IN POLVERE
POWDER COATINGS

ENDURANCE
THE NEW FAMILY
OF
ANTICORROSIVE
PRODUCTS
BY PULVERIT

ENDURANCE

Maintaining the same substrate and pretreatment, these products allow an increase in corrosion resistance between 30-50% compared to a traditional powder paint.

System characteristics:

Reduction of paint film permeability

Greater adherence to the substrate

Better edge coverage

Endurance :

PRIMER (based on **epoxi** resin)

Finish product (based on **polyester Qualicoat** resin).
